abhayganes154@gmail.com ♦ +91 9048415225 ♦ Bengaluru, Karnataka

[LinkedIn](#) ♦ [Portfolio](#) ♦ [GitHub](#)

PROFESSIONAL SUMMARY

BCA student with interests in Software Engineering, Artificial Intelligence, Information Retrieval, Algorithms, and Intelligent Systems. Experienced in developing backend applications, Retrieval-Augmented Generation (RAG) systems, and real-time web platforms through academic and independent projects. Passionate about solving large-scale computing problems and exploring research-driven applications of computer science.

EDUCATION

Bachelor of Computer Applications (BCA)

St Joseph's University, Bengaluru, Karnataka

2023 – 2026

Completed Coursework, Degree Award Pending

Senior Secondary School

Vyasa Vidya Peethom, Palakkad, Kerala

2020 – 2022

RELEVANT COURSEWORK

Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Discrete Mathematics

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, SQL

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Backend Development

Artificial Intelligence & Information Retrieval: Retrieval-Augmented Generation (RAG), Semantic Search, Vector Embeddings, Large Language Models (LLMs), Prompt Engineering

Frameworks & Libraries: FastAPI, Node.js, Express.js, ReactJS, LangChain

Databases: MySQL, MongoDB, ChromaDB

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render

Soft Skills: Problem Solving, Research Mindset, Communication, Team Collaboration

PROJECTS

AI-Powered Document Q&A (RAG System)

May 2026

Tech: Python, FastAPI, LangChain, HuggingFace Transformers, ChromaDB, Sentence Transformers

[GitHub](#)

Developed a Retrieval-Augmented Generation (RAG) system for document understanding and context-aware question answering. Implemented semantic search using vector embeddings, information retrieval pipelines, and ChromaDB vector storage to retrieve relevant document context before generating responses with a local Large Language Model (Flan-T5). Built RESTful APIs using FastAPI for document ingestion, embedding generation, and query processing.

Smart'Q – Smart Queue Management System

Dec 2025 – Mar 2026

Tech: Node.js, Express.js, MongoDB, REST APIs, ReactJS, Python

[Live](#)

Role: Backend Engineer · Team of 3 · BCA Final Year Major Project

Contributed to the development of a scalable smart queue management platform that enables digital queue joining, real-time queue tracking, and administrative monitoring. Designed and integrated RESTful services, database operations, and real-time system components while collaborating in a team environment. The system incorporated predictive analytics capabilities for wait-time estimation and crowd insights.

Movie Suggestion App

Sep 2025

Tech: HTML, CSS, JavaScript, TMDb API

[Live](#)

Developed a movie discovery application that integrates external APIs to retrieve and present real-time movie information. Implemented search functionality, genre-based filtering, and dynamic user interfaces using JavaScript and REST-based data retrieval.

Weather App

Sep 2025

Tech: ReactJS, JavaScript, OpenWeatherMap API

[Live](#)

Built a responsive weather application that consumes real-time API data to display temperature, humidity, and wind conditions. Designed reusable React components and implemented client-side data processing for enhanced user experience.

Personal Portfolio Website

Feb 2025 – Mar 2025

Tech: HTML, CSS, JavaScript, Responsive Web Design

[Live](#)

Designed and developed a responsive portfolio website to showcase projects, technical skills, and professional achievements across multiple devices.

ADDITIONAL INFORMATION

Languages: Malayalam, English, Tamil, Hindi, Kannada

Certifications: Full Stack Developer Certificate; Deloitte Technology Job Simulation; Deloitte Cyber Job Simulation; Introduction to Data Science; Introduction to Artificial Intelligence; Python Bootcamp; Prompt Engineering and Responsible AI for Developers; Responsible Generative AI (Microsoft)

Interests: Software Engineering, Artificial Intelligence, Information Retrieval, Algorithms, Intelligent Systems, Research-Oriented Computing
