Dear Hiring Manager,

I am writing to express my interest in the Graduate Apprentice Trainee position at Volvo Group. I was encouraged to apply for this opportunity by my academic mentor and department coordinator at St. Joseph's University, **Mr. Timothy Paul**, whose association with Volvo Group further strengthened my interest in contributing to your organization.

I recently completed my Bachelor of Computer Applications from St. Joseph's University, Bengaluru, where I developed a strong foundation in software development, data structures, databases, and cloud technologies. I am passionate about building practical technology solutions and continuously expanding my technical skills.

As part of my academic journey, I have developed projects such as Smart'Q, an intelligent queue management system designed to improve customer experience through predictive analytics, and Document-QA, a Retrieval-Augmented Generation (RAG) based application that enables users to interact with documents using natural language queries. Through these projects, I gained hands-on experience with Python, machine learning concepts, database management, API integration, and modern AI technologies.

I am excited about the opportunity to learn from and contribute to Volvo Group's culture of innovation, technology, and continuous improvement. I am confident that my technical curiosity, willingness to learn, and professional experience will allow me to make a meaningful contribution as a Graduate Apprentice Trainee.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background and enthusiasm align with the needs of your team.

Sincerely,

Abhay Krishna
